## Canadian Election Study, 2000 (CES 2000)

### *Étude électorale canadienne 2000*

Overview	
Type	Canadian Election Study
Identification	CES-E-2000
Series	<p>The primary mandate of the Canadian Election Study is to provide a thorough account of the election, to underline the main reasons why people vote the way they do, to indicate what does and does not change during the campaign and from one election to another, and to highlight similarities and differences between voting and elections in Canada and in other democratic countries.</p> <p>The second mandate is to contribute to the development of scientific knowledge regarding the motivations of voters and the meanings of elections and election campaigns in democratic societies.</p> <p>The third mandate is to assemble a rich set of data about Canadians' attitudes and opinions on a wide variety of social, economic, and political issues, and to make that data publicly available to researchers in political science, sociology, economics, communications, and journalism.</p>
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Candidates, Corruption, Debate, Economic Conditions, Elections, Individual, Influences, Leaders, Media, Policies, Political Parties, Promises, Resultes, Seats, Taxes, Votes, Voting
Topics	Election, Politics, Public Opinion
<u>Time Period(s)</u>	2000-2001
<u>Countries</u>	Canada
<u>Geographic Coverage</u>	Canada, Provinces
<u>Universe</u>	Canadian Electorate

Producers & Sponsors	
Primary Investigator(s)	André Blais, Université de Montréal Elisabeth Gidengil, McGill University Richard Nadeau, Université de Montréal Neil Nevitte, University of Toronto
Other Producer(s)	Institute for Social Research (ISR) , York University , Distributor
Funding Agency/ies	Elections Canada

Data Collection	
Data Collection Dates	start 2000-10-24 end 2001-03
Time Period(s)	single 2000

**Data Collection Notes**

As was the case for the 1988, 1993 and 1997 Canadian Election Survey (CES), the 2000 CES included three survey components. The election writ was dropped on Sunday October 22 and the Campaign-Period Survey (CPS) started on Tuesday Oct 24th and continued until the last day of the campaign--November 26. Data was collected for 34 days, however the first day of calling did not include any cases from the province of Quebec. Of those respondents who completed the CPS, almost 80 percent also participated in the Post-Election Survey (PES). The PES commenced the day after the November 27th election and continued for 15 weeks, with the exception of about a week around Christmas. (The date of completion for all CPS and PES interviews is included in the data set.). Respondents were normally sent the Mailback Survey (MBS), one to two weeks after completing the PES. The MBS was completed by 53 percent of the PES respondents (or 42 percent of the CPS respondents). (Taken from: The 200 Canadian Election Survey Technical Documentation)

## Group Electoral Results

### Notes

The first series of variables include electoral results, for both 1997 and 2000 elections, in the respondent's electoral district. It also includes a variable that indicates whether or not the candidate of a given party was an incumbent.

<b>Subgroup(s)</b>	1997 Election , 2000 Election , Incumbency

### Group Constituency Variables

#### Notes

The constituency contextual variables are imported from the 1996 census. Most data are raw numbers, i.e. count of the number of people that fall into the different categories of the variables. The first variable of each section is the total

count for that specific section. For definitions of the concepts used in the census, see the Statistic Canada website ( <http://www.statcan.gc.ca/> ( <http://www.statcan.gc.ca/>)).

<b>Subgroup(s)</b>	Population , Age , Civic Status , Census Family Size , Household Size , Immigrant/Non-Immigrant Status , Mother Tongue , Labour Force Activity Status , Level of Schooling , Mobility , Labour Force by Occupational Categories: Total Population , Labour Force by Occupational Categories: Male , Labour Force by Occupational Categories: Female , Income

# pesc1e: How do you feel about the BLOC QUEBECOIS?			
Information	[Type= discrete] [Format=numeric] [Range= 0-999] [Missing=*/998/999]		
Statistics [NW/ W]	[Valid=893 /-] [Invalid=2758 /-]		
Universe	Asked only to respondents who reside in the province of Quebec. Asked only to respondents who did not state that they "don't know about any of the parties" for #c1a, #c1b, #c1c, #c1d, if previously asked.		
Literal question	How do you feel about the BLOC QUEBECOIS? Use any number from zero to one hundred. Zero means you really DISLIKE the party and one hundred means you really LIKE the party.		
Post-question	If respondent states that they "don't know about any of the parties", go to #c2a.		
Notes	Order of party delivery is randomized.
