Canadian Election Study, 2004-2006 (CES 2004-2006)

Étude électorale canadienne 2004-2006

Overview	
Type	Canadian Election Study
Identification	CES-E-2004-2006
Series	<p>The primary mandate of the Canadian Election Study is to provide a thorough account of the election, to underline the main reasons why people vote the way they do, to indicate what does and does not change during the campaign and from one election to another, and to highlight similarities and differences between voting and elections in Canada and in other democratic countries.</p> <p>The second mandate is to contribute to the development of scientific knowledge regarding the motivations of voters and the meanings of elections and election campaigns in democratic societies.</p> <p>The third mandate is to assemble a rich set of data about Canadians' attitudes and opinions on a wide variety of social, economic, and political issues, and to make that data publicly available to researchers in political science, sociology, economics, communications, and journalism.</p>
<p>Abstract</p> <p>As a result of the Canadian Federal Election held on Monday June 28, 2004, the Liberal Party formed a minority government. Telephone surveys, conducted during the campaign and after the election with a random sample of Canadians, provide data that can be used to help explain the election outcome.</p> <p>Within 17 months, Canadians again went to the polls and the result of the January 23, 2006 vote was a second minority government, but under the leadership of the Conservative Party. Efforts were made to interview the respondents to the 2004 survey again for the 2006 survey and about one-half of the 2004 survey respondents also answered the 2006 survey. These re-interviews provide a panel or longitudinal sample component where a respondent's answers to questions in the first survey can be compared to those of the second survey. Many of the questions asked in 2004 were repeated in the 2006 survey. The remaining respondents to the 2006 survey were a random sample of Canadians.</p>	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Candidates, Corruption, Debate, Economic Conditions, Elections, Individual, Influences, Leaders, Media, Policies, Political Parties, Promises, Seats, Taxes, Votes, Voting
Topics	Election, Politics, Public Opinion
Time Period(s)	2005-2006
Countries	Canada
<p>Geographic Coverage</p> <p>Canada, Provinces</p>	
<p>Universe</p> <p>Canadian Electorate</p>	

Producers & Sponsors	
Primary Investigator(s)	<p>André Blais, Université de Montréal</p> <p>Joanna Everitt, University of New Brunswick</p> <p>Patrick Fournier, Université de Montréal</p> <p>Elisabeth Gidengil, McGill University</p> <p>Neil Nevitte, University of Toronto</p>

Funding Agency/ies	Elections Canada

Data Collection	
Data Collection Dates	start 2005-11-30 end 2006-03-27
Time Period(s)	start 2004 end 2006
<p><u>Data Collection Notes</u></p> <p>The 2004 CES included three survey components: the Campaign-Period Survey (CPS), the Post-Election Survey (PES) and the Mail-back Survey (MBS). Interviews in the CPS were collected over the 36 days of the campaign, from Sunday May 23 (the day the writ was dropped) to Sunday June 27, 2004, the day before the election on Monday June 28. The PES survey commenced one week after the election on July 5, and ran to Sunday September 19, 2004. The gap between the election and the start of the PES was not typical of earlier CES where the PES started one or two days after the election. The delay was caused by uncertainty about who would form the government, depending on recounts, and the desire not to start the PES on the Canada Day holiday weekend. The MBS started about one week after the start of the PES, and questionnaires returned to ISR before the end of November, 2004 were added to the data file.</p> <p>The 2006 CES included two survey components: the Campaign-Period Survey (CPS)¹ and the Post-Election Survey (PES). Interviews in the CPS were collected between November 30, 2005, the day after the Liberal government lost a confidence motion over the budget, and January 22, 2006 the day before the vote. Interviews were not completed between December 22 and December 27, 2005 and December 30, 2005 to January 1, 2006. The PES survey commenced the day after the vote, January 24, 2006 and ran to March 27, 2006. The principal co-investigators of the 2006 Canadian Election Study (CES) are: André Blais, Department of Political Science, University of Montreal, Joanna Everitt, Department of Political Science, University of New Brunswick, Patrick Fournier, Department of Political Science, University of Montreal, Elisabeth Gidengil, Department of Political Science, McGill University and Neil Nevitte, Department of Political Science, University of Toronto. The five researchers are responsible for the design and conduct of the 2004 and 2006 Canadian Election Studies. Funding for the 2006 study was provided by Elections Canada.</p>
